The photo on the cover: Archaeological trench in Dominican Square. Krakow, showing the following layers (from the bottom upwards): (i) fluvial sand (yellow); (ii) humic layer (dark brown); (iii) sand layer of uncertain origin; (iv) thick anthropogenic layer resulting from accumulation of organic debris (black; 10th–mid-12th century); (v) red brick debris related to construction of the oldest Dominican Church (1st half of 13th century); (vi) light in colour layer related to the graveyard functioning from 13th to 18th century. The black trapezoid form seen in the distant corner of the trench, and interrupting horizontal continuity of the bottom layers (i–iii), is a cross-section of a storage pit dated to the period from 10th to mid-12th century (*phot. Monika Łyczak*)
